

# FEATURES & BENEFITS

**HYDRAULIC DEPTH STOP** - Infinite range of adjustments to tailor coulters depth to seeding depth.

**END WHEEL DESIGN** - Rugged time proven design that stays on side-hills and maintains accuracy going over hills and valleys.

**OPTIONAL WEIGHT BRACKETS** - The 606NT has a weight bracket that can be added to each end of the drill to add up to 600 lbs of weight for better penetration in extremely difficult no-till conditions.

06 Series

## End Wheel Efficiency

The 6' Pull-type No-Till Drill (606NT) features an end wheel design that reduces side-loading on openers when operated on contours and curves, eliminating premature opener wear.

With the optional native grass and small seeds box this machine is quite capable in pasture renovations and food plot seeding.

Other features like heavy duty coulters, calibration crank, central grease bank, lock-out hubs for transport, and optional weight brackets create a system designed for long-term dependability and productivity in a broad range of seeding applications.
