

FEATURES & BENEFITS

LOCK OUT HUBS - Disengages all drive components for transport reducing wear and tear.

CALIBRATION CRANK - Specialty seeds are expensive and calibrating your machine will allow you to put on only the amount you desire.

HYDRAULIC OPENER LIFT/DOWN PRESSURE - Tractor hydraulics raise and lower the openers quickly. They also apply static down pressure to the row units.

Big Performance in a Small Package

This 8' Min-Till Drill (800) is a smaller version of our 1300 End Wheel Drill that uses the same field proven "00" series opener to properly place seed. This rugged opener utilizes 13.5" 4mm thick disc blades, full length seed tube and an 18 position T-handle press wheel to precisely control seed depth. Changing the 5-position, centrally located opener down pressure adjustment is quick and easy, ensuring the correct down pressure regardless of the conditions.

Other features include a 1 3/4" fluted feed metering system. It utilizes a 4-speed gear box and adjustable gate opening to accurately set a wide variety of

planting rates for crops from alfalfa to peas. You may also add a dry fertilizer and/or a small seeds attachment to tailor the drill to your needs.

Other features include a lock-out hub to free wheel the drive system during transport. Safety lighting, electronic acre meter, lift cylinder with hoses, calibration crank, "V" bottom dividers for easy clean out, and folding tongue are all standard equipment.

Optional equipment includes: air design disk scrapers, seed box agitator, and seed firmers- either Keeton Seed Firmers® or exclusive Seed-Lok® firming wheels.
