

60' Bulk Yield-Pro® Planter

60' Bulk Yield-Pro® Planter

Great Plains proudly introduces the industry's first 60-foot planter that has the ability to plant 15" and Twin-Row 30". (20 and 30-inch spacings are also available.) The YP-2425 features a floating hitch design that provides the flexibility to meet challenging terrain. Yet, the 60-foot Yield-Pro® model easily folds to a transport width of only 14 feet, 10 inches. The telescoping tongue retracts in field position for short headlands and outstanding maneuverability.

The YP-2425 can be equipped with two 82-bushel poly hoppers or two seed company's bulk seed boxes. With its 164-bushel capacity, it can easily plant up to 160 acres of soybeans or 250 acres of corn in one fill. This increases efficiency by approximately 52% in soybean's and 12.8% in corn, when

compared to a planter with individual hoppers. Like all Yield-Pro® planters, the YP-2425 uses air to gently move seed from the hopper to the individual row meters mounted on field-proven 25 series openers. Choose from the Air-Pro® Seed Metering System, Population Max™, or the Singulator-Plus™ Meter.

Add the optional 2,000 gallon fertilizer cart, and apply in-row and/or between-row fertilizer at planting time to minimize passes and fuel usage. The YP-2425 row units can be equipped with a wide range of attachments, including no-till coulters, frame-or unit-mounted row cleaners. Any way you equip it, the YP-2425 Yield-Pro® is designed to increase productivity and improve yields on your farm.

"Setting the pace through innovation."

Features

- 1. NARROW TRANSPORT** - Yield-Pro® planters fold to narrow transport widths for safe and easy road travel.
- 2. TELESCOPING TONGUE** - The telescoping tongue puts planter closer to tractor in field position allowing tighter turning on end rows.
- 3. BULK SEED BOXES** - Poly Hoppers and Seed Companies bulk seed boxes are completely interchangeable.

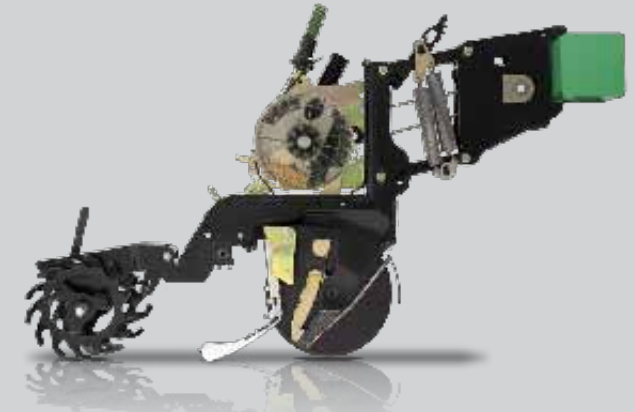

Specifications

MODEL INFO	
MODEL	YP-2425
ROW SPACINGS	TR30", 15", 20", 30"
WEIGHT (approx)	32,100 lbs (30" 24 Rows), 38,750 lbs (30" 24 Twin-Row)
TIRE SIZES	15-19.5 NHS 12 PLY
H.P. REQUIREMENTS	280-440
DIMENSIONS	
WORKING WIDTH	60'
WIDTH (transport)	13' 6"
HEIGHT (transport)	12' 6"
LENGTH (transport)	50' 10"
CLEARANCE (transport)	22"
OPENER INFO	
OPENER SERIES	25 Series
OPENER TRAVEL	10"
OPENER DEPTH RANGE	0 to 4"
OPENER DOWN PRESSURE	330 to 535 lbs
CAPACITIES	
SEED HOPPER CAPACITY	Optional 82 bu hoppers or ProBox 50 unit bulk seed container

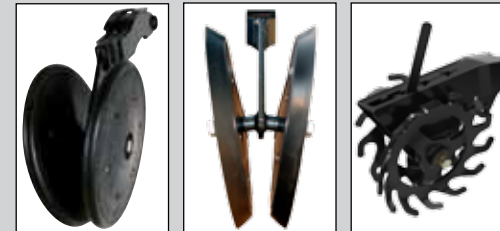

OPTIONS		
AIR-PRO® SEED METERING SYSTEM	SINGULATOR METER™	POPULATION MAX™ METERS
STARTER FERT. w/2000 GAL CART	FLAT FOLD MARKERS	CHOICE OF PRESS WHEELS
POLY HOPPERS	KEETON SEED FIRMERS®	PULL HITCH
UNIT MOUNT COULTERS	FLUTED, WAVY, OR TURBO BLADES	HYDRAULIC TONGUE
ROW CLEANERS	TERRA-TINE ROW CLEANERS	

Note: All specifications subject to change without notice.

25 Series Row Unit

The 25 series row unit was designed to plant more accurately, last longer, and be easier to maintain than the competition. This row unit can be ground driven or hydraulically driven if you want to vary population based on yield maps. It is a parallel linkage design so the row unit is always in the optimal planting position. The opener body and parallel arms were designed to be narrower yet stronger than conventional 30 inch openers. Being narrow allows the row unit to plant twin-row crops with each pair being only 8" apart.

- 1. 1X12 DOUBLE PRESS WHEELS** - This design closes the seed trench with an aggressive pinching action. It provides excellent depth control in most soil conditions.
- 2. 1.25X13.5 WEDGE WHEELS** - The "Best of Both Worlds," with an aggressive tapered edge it closes seedbeds in firm soil but a large "footprint" allows it to stay on top in loose soil.
- 3. SPIDER WHEELS** - It pulls the soil into the row and achieves excellent seed-to-soil contact.
