

# FEATURES & BENEFITS

**1000 GALLON POLY TANK** - Mid-sized capacity for easier control with tractors and less ground compaction than larger models.

**FLUSH AND RINSE** - 100 gallon fresh water tank with 3 turret nozzles for quick and complete clean out.

**ELECTRO/HYD. BOOM CONTROLS** - Provide fingertip control of all boom function; controls seven functions with one hyd. outlet.

## Simplified Spraying

The TSF-1080 and TSF-1090 sprayers provide a higher level of field efficiency while remaining light on their feet. Both 1000 gallon models feature 80' or 90' booms which can be used full width in those big fields or simply fold the outer wings in and operate as a 60' boom for those smaller fields.

The TSF-1060 while having the same tank, rugged frame, axle, and boom construction has a 60' boom to meet your sprayer needs. All of these models are field proven to provide you years of accurate application, while enhancing your pesticide performance and crop safety.
